

Rollforming Services offer a custom roll forming service where we can tool up a machine to do limited runs of your custom profile as you need it. This allows you to design a product exact fit for purpose, therefore reducing rework or wastage experienced when using off the shelf angles and channels.

We are also able to form tighter profiles than what standard folding techniques allow.

Lengths can be run any length you require again reducing waste

PRODUCT DESCRIPTION

Custom Profiles can be made to the following parameters

- 0.4mm - 3.0mm thick
- 380mm maximum strip width
- Max leg height 80mm
- Max width 200mm
- Punching Available on request

MATERIAL

- HRMS (Hot rolled mild steel)
- CRMS (Cold rolled mild steel)
- G250 Z275 Galv
- Stainless steel
- Colour Steel
- Zinalume
- Aluminium
